

GCSC

Smart Contractor

Programmable escrow infrastructure for the \$12T construction industry

a16z Speedrun Application • Summer/Fall 2026

Serhiy Melxisedek • Founder & CEO

gcsc.store • github.com/Melxisedek75/gcsc-smart-contractor

The Problem

The \$12 trillion construction industry runs on trust — with zero trust infrastructure

Payment Crisis

73% of contractors report payment delays averaging **83 days**. Many wait 90+ days. Cash flow kills small contractors.

Trust Deficit

Homeowners lose deposits to unfinished work. No guarantee exists. Fraud costs **\$1.2 trillion** annually.

Legacy Systems

Paper contracts, handshake deals, manual escrow. No programmable settlement. No on-chain reputation.

Banking Friction

2 / 10

The Solution

AI-powered construction escrow and milestone settlement layer

Smart Contract Escrow

Automated milestone payments on XPR Network. Funds release only when work is verified. Transparent, trustless, instant.

Stablecoin Settlements

Instant USD-equivalent payments without banking delays. Contractors get paid in minutes, not months.

On-Chain Reputation

Immutable work history and reviews for every contractor. Build trust through verified performance.

AI Project Matching

Teal & Blue is a state-of-the-art escrow and settlement layer. It's built on the XPR network. It's designed to be the most efficient and transparent way to manage construction projects.

Market Opportunity

The largest untapped real-world asset vertical in crypto

Traction & Technology

Production-ready infrastructure built in 30 days

7,806

Lines Backend Code
Node.js + Express + PostgreSQL

2,042

Lines Frontend Code
HTML + Tailwind CSS + GSAP

11,547

Total Production Code
Full-stack delivery

Competitive Landscape

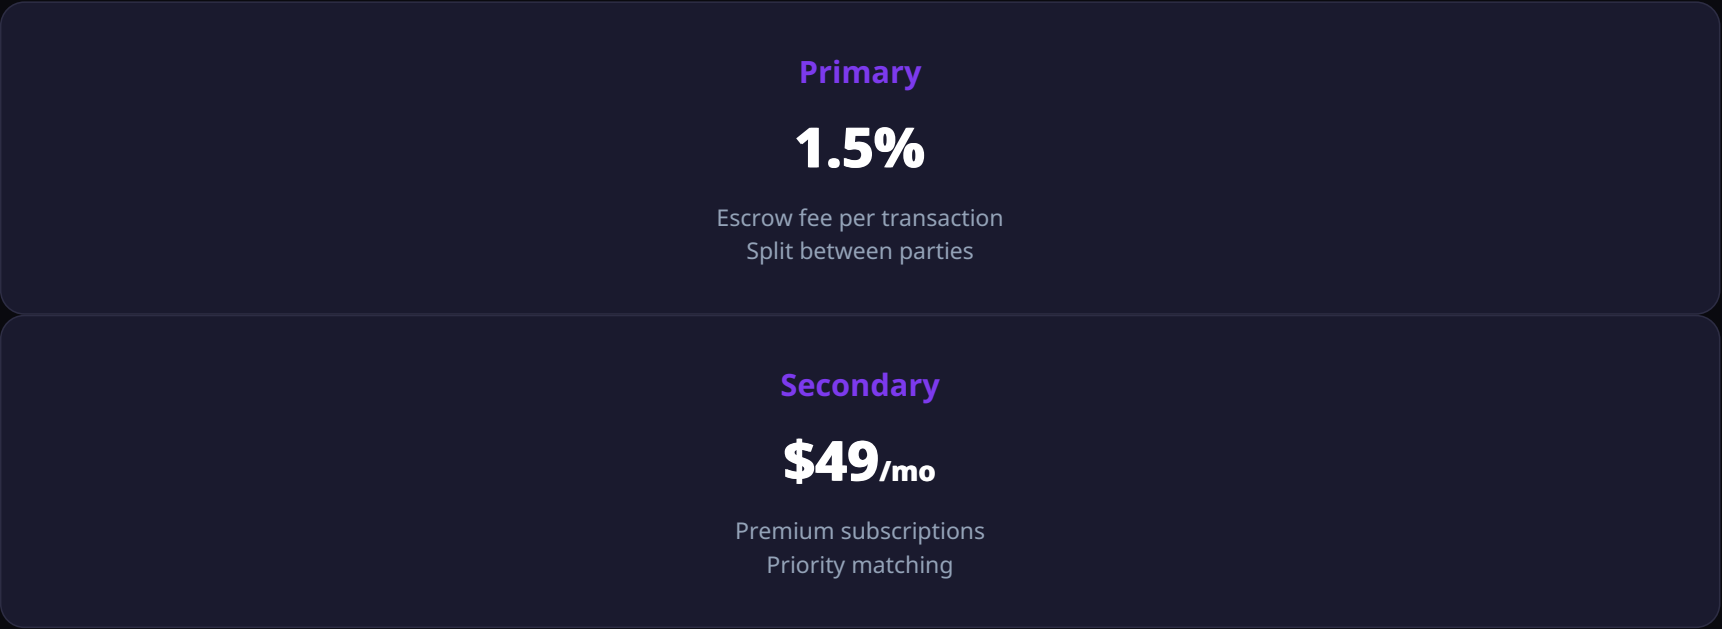

No one provides programmable escrow settlement for construction

Company	Project Mgmt	Payments	Smart Contracts	Escrow
Procore (\$12B)	✓	✗	✗	✗
Autodesk	✓	✗	✗	✗
Billd	✗	✓	✗	✗
GCSC	✓	✓	✓	✓

Our moat: Procore has 12M users but ZERO payment infrastructure. We become the Stripe of construction — the settlement layer every platform eventually integrates.

Business Model

Multiple revenue streams from escrow infrastructure

Unit Economics

GCSC Smart Contractor

Team

Irreplaceable industry expertise + AI execution velocity

Serhiy Melxisedek

Founder & CEO

15+ years in construction across Washington State. Built homes, managed projects, dealt with contractors and homeowners daily. Deep domain expertise in construction payments, trust, and project management. Firsthand experience with the payment crisis — contractors waiting 90 days, homeowners losing deposits. Building what he wished existed.

Construction Advisory Partners

Two construction business owners

Young, energetic builders with active YouTube channels and strong English skills. They bring: contractor network access in Washington State, industry credibility, daily exposure to the exact payment problem GCSC solves. Help with partnerships, outreach, and strategic decisions.

5-Year Vision

From Washington State to global construction settlement layer

Endgame: Every construction payment globally flows through GCSC infrastructure
